James F. Glenn, M.D.
Scientific Director
The Council for Tobacco Research
900 Third Ave
New York NY 10022

Dear Dr. Glenn:

My laboratory is working on molecular biology of human keratin genes. We are interested in the regulation of expression of keratins in epidermis and other epithelia. We have found that the promoters of keratin genes are cell-type specific and directed regulated by nuclear receptors for retinoic acid and thyroid hormones. They are also differentially expressed in various carcinomas. Therefore, I am interested in applying for a grant in basic biomedical research from the Council for Tobacco Research. Could you please send me more information about applying for these grants?

Sincerely yours,

M. Blumenberg

Miroslav Blumenberg, Ph.D.
